CONTRACT HIRE

Contract hire is widely seen as a popular way to operate cleaning equipment. End-users pay a fixed monthly rental which includes maintenance and servicing and enjoy a unique combination of features and benefits.

Contract hire is generally used by businesses that want to...

- Fix their cleaning equipment costs for up to 7 years
- Offset 100% of rentals against taxable profits
- Take advantage of 'off balance sheet' funding
- Enjoy usage benefits without ownership risks
- Use their cash in other areas of the business

With Contract hire you have...

- No need to budget for unexpected maintenance costs
- No need to tie up cash in depreciating assets
- No need to pay big deposits or VAT on delivery
- No need to constantly negotiate servicing costs
- No need to constantly borrow funds on an overdraft facility
